EMOTION

When colour and form merge into one.

The Emotion series brings colour to form - and structure to every detail. The new line is not only visually appealing, but also tactile: seven new powder-coated sand and stone colours have been added to the portfolio - perfectly coordinated with current tile trends. Whether soft greige, deep matt black or natural stone colours: With Emotion, the transition zone between tile and room becomes a design element.

Tone-on-tone - with Emotion, you can create design accents that can be seen and felt. The hard-wearing surface and high-quality finish ensure a harmonious overall look that perfectly combines design and function. Available in stainless steel and aluminium - for sophisticated projects with a feel for nuances.

Colours that complete rooms.

The new colours in the Emotion series create more than just transitions - they create atmosphere. They pick up on the colour worlds of modern tiles and create a calm, architecturally sophisticated overall picture. For design that blends in - and leaves an impression.
