# PROCONNEX

Patented solution with individually color-adjustable silicone insert

- Color of the silicone insert individually selectable
- Colour-matched support profiles available (for stainless steel and aluminum)
- Various profile heights available
- Also available with height offset
- Flexible variants for curves and bends (PROCONNEXcurve)

# ADVANTAGES AT A GLANCE

Our **PROCONNEX** and **PROCONNEX REM** expansion joint profiles are equipped with an adaptable silicone insert and thus effectively cushion tensions in the floor covering - adapted to your individual needs on site.

## **Individual color design**

Silicone inlay in your color of choice for a perfect design

## **Maximum flexibility**

Ideal for demanding expansion joints

## **Durable & robust**

Resistant to external influences

## **Easy to install**

Quick and easy installation

## **Versatile application**

Suitable for indoor and outdoor

# READY FOR ANY TASK

The complete selection of expansion joint and screed profiles as well as further information can be found on our website at [www.proline-systems.com](http://www.proline-systems.com)

## PROCONNEX

The flexible thin-bed profile made of aluminum, stainless steel or plastic

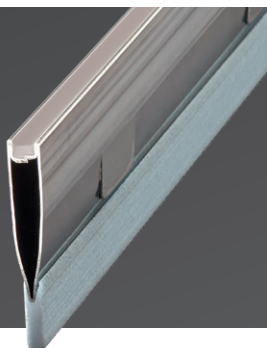

## PROCONNEXcurve

The bendable aluminum thin-bed profile for radial terminations and material separations

## PROCONNEX REM

The patented screed and thick-bed profile made of stainless steel for heavy loads
